Title	REPAIR SOLDERING METHOD FOR REPAIRING A COMPONENT WHICH COMPRIMES A BASE MATERIAL WITH AN ORIENTED MICROSTRUCTURE			

Commissioner For Patents

P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

RESPONSE TO RESTRICTION REQUIREMENT

In response to the Office Action mailed October 26, 2009, the Examiner asserts that the claims include three patentably distinct groups and requires Applicant to select for examination one of the following groups:

- Group I Claims 11-19, drawn to a method for repairing a component,
- Group II Claims 20-22, drawn to a method for repairing a turbine blade, and
- Group III Claims 23-25, drawn to repaired article/component,

Applicant agrees with the Examiner's determination of patentable distinctness between each of the Groups and in response elect, without traverse, to prosecute for examination purposes the patentably distinct invention specified in **Group 1** (Claims 11-19). However, Applicant urges the Examiner to **carefully reconsider** the patentable distinctness determinations made as set forth in MPEP 806.04(h) and 808.01(a) in regards to the impact on prior art references in future divisional applications.
